

# Supplies Needed For Proper Care Of Surgical Wound

Patient Name: \_\_\_\_\_ Date of Birth: \_\_\_/\_\_\_/\_\_\_

Today's Date: \_\_\_/\_\_\_/\_\_\_

You are to have surgery in our office in the near future. The result of surgery is a surgical wound and proper care must be taken so that wound heals with minimum risk of infection.

You are instructed to have on hand the following items to be used to care for your surgical wound. It is advisable to gather these items prior to surgery so they will be readily available when they are needed.

- \_\_\_\_\_ Peroxide
- \_\_\_\_\_ Alcohol (rubbing)
- \_\_\_\_\_ Bacitracin ointment
- \_\_\_\_\_ Polysporin ointment
- \_\_\_\_\_ Pain Reliever:  Tylenol  Other  Will be prescribed
- \_\_\_\_\_ Cotton Balls
- \_\_\_\_\_ Q-Tips
- \_\_\_\_\_ 2 X 2 gauze pads
- \_\_\_\_\_ 4 X 4 gauze pads
- \_\_\_\_\_ 4 X 4 Telfa pads
- \_\_\_\_\_ Paper or silk adhesive tape:  1/4 inch  1/2 inch  1 inch
- \_\_\_\_\_ Kling dressing
- \_\_\_\_\_ Band-Aids:  spots  1 inch  other \_\_\_\_\_
- \_\_\_\_\_ Other: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Be sure if you are using items that you have had on hand for some time that they are relatively new and the package or seal has not been broken. You will be given postoperative instructions after surgery.
